x Identify area(s): Dual - Elementary/ Special Education
I. Contextual Information

(1) Description of any state or institutional policies that may influence the application of the standards. Approximately ten years ago, the Board of Trustees, over concerns of the cost of operating the campus on a per graduate basis, directed our university administration to graduate more students. Further, they directed the university administration to become more efficient in reaching this goal by reducing the number of hours required to complete a baccalaureate degree and the amount of time allowed to complete that degree. As a result of the Board’s directive, the university administration initiated what was referred to as “The Charge.” As a result of “The Charge,” every academic program on campus conducted its own internal assessment and made appropriate changes to comply with the Board’s directive by showing that any student could complete that major with 120 semester hours and do so in a four year enrollment period.

Prior to “The Charge,” the university had requested that programs be streamlined so that students could graduate with a degree as close to 128 semester hours as possible. Fortunately, the dual elementary/special education program had taken that guideline seriously and was graduating students with a 128 hour degree. Therefore, when the Board’s directive came, the dual elementary/special education program was positioned so that changes were minimal as compared to other programs on campus. Nevertheless, in order to comply with the Board’s directive, the dual elementary/special education program had to cut six hours from its program. This was accomplished by reducing two four-credit courses to three credits (Reading Methods and Math Methods), eliminating a three-credit course in Math Concepts, and reducing the Media course from two credits to one credit. (Attachment 1.1)

(2) Description of the field and clinical experiences required for the program, including the number of hours for early field experiences and the number of hours/weeks for student teaching or internships. The dual elementary/special education teacher education program of study is divided into three areas: Pre-Professional, Academic Support, and Professional Year. In the Pre-Professional Area, all students take EDUC 212: Foundations of Education (2 semester hours). As a part of EDUC 212, all students complete ten to twenty hours of field experience. [Note: The hours vary based on the available schedule of the student. Ten is considered an absolute acceptable minimum of field experience hours.] Students are assigned to a teacher in a local elementary school and, in recent semesters/terms, have been specifically assigned to tutor a specific student in that classroom. At the

---

1 Brigham Young University Hawaii Bulletin 2005-2006 General Catalog, p. 91.
end of the EDUC 212 experience, the classroom teacher has an opportunity to evaluate the EDUC 212 student and the EDUC 212 student reflects on their experience through a journal submission to the course instructor.

Students who advance to the next phase, Academic Support Area, will have similar field experiences in the following courses: EDUC 300 and EDUC 312. EDUC 300: Human Growth and Learning (2 semester hours) focuses on learning theories as applied in the public school classroom. Teacher candidates are required to complete ten hours of field experience in a public school classroom. EDUC 312: Effective Pedagogy (3 semester hours) focuses on teaching methods. Teacher candidates are required to complete ten hours of field experience in a public school classroom, observing classroom dynamics and applied principles learned in the course.

The next phase of the dual elementary/special teacher education program, Professional Year, is the culminating training and field experience for teacher candidates. Beginning with EDUC 491: Observation and Practicum (O&P) (4 semester hours), teacher candidates begin their field experience by working side-by-side with their assigned Cooperating Teacher for three weeks at the start of the public school year. Teacher candidates report to their assigned school on the first contract day for their Cooperating Teacher. In most cases, this means the teacher candidate has two work days to work with their assigned teacher. Often, the teacher candidate will report earlier than that in order to help their teacher, since most of our Cooperating Teachers begin the school year earlier than required by their union contract.

Following the initial three weeks, teacher candidates have become familiar with the school schedule, routines, curriculum, etc. They also have had the opportunity to establish a rapport with the students. At that point, until Fall Semester 2006, the teacher candidates assumed an O&P schedule for the remainder of the semester as follows: all day in the public school classroom on Monday; all morning on Tuesday, Wednesday, and Thursday. On Tuesday, Wednesday, and Thursday afternoons, teacher candidates returned to the university campus to complete the remaining courses in the Professional Year sequence: ELED 320 (Language Arts Methods), ELED 321 (Reading Methods), EDUC 330 (Classroom Management) and ELED 351 (Math Methods).

However, beginning with the Fall Semester 2006 O&P, although O&P teacher candidates still spend the same amount of hours in their classroom, the schedule has been re-configured. Following the initial full day, three weeks with their Cooperating Teacher and classroom, the O&P teacher candidates then finish the O&P semester by spending all day Monday and Tuesday and all morning on Wednesday in their assigned classroom. Thursday and Friday are then used to complete the remaining college courses. However, only one course is taken at a time. When the
first course finishes, then the second one begins the next Thursday or Friday, and so on until all courses are completed. In this new configuration, O&P teacher candidates are only taking one course at a time and no course is taken on a day that the O&P teacher candidate is in their assigned classroom.

The new O&P schedule was implemented largely in response to students’ feedback that they felt overwhelmed trying to rush back from their schools on Tuesday, Wednesday and Thursday, as well as balancing the demands of the different professors for the courses they were concurrently taking. This change seemed timely in light of the new uniform calendar which required us to make some adjustments in the schedule anyway. First, with the implementation of the Hawaii Department of Education uniform calendar, all O&P teacher candidates would be reporting at the same time. Until Fall 2006, we had students reporting at three different times based on individual school calendars. Second, under the previous calendar, some teacher candidates in the Student Teaching semester had to begin their soloing by the end of January, only two to three weeks into the Student Teaching semester, in order to accommodate the state testing program.

During the O&P semester, teacher candidates generally complete around three hundred hours in their assigned classroom. During this semester, after the initial period of observation, getting oriented to the duties of a teacher, etc., the teacher candidates teach lessons that are observed by a cohort of professionals: the cooperating teacher, university faculty and university adjunct faculty.

Once the teacher candidate successfully completes the O&P semester, he/she is advanced to the culminating semester as a student teacher in EDUC 492: Student Teaching. During the semester of student teaching, the teacher candidate will complete approximately six hundred hours in the public school classroom. During this field experience, the teacher candidate must demonstrate full competence in fulfilling all the duties of an elementary and/or special education public school classroom teacher. The teacher candidate will be formally observed by his/her cooperating teacher, university faculty and university adjunct faculty. Upon concurrence of the university faculty and the cooperating teacher that the teacher candidate has met each and every one of the performance and licensing standards, he/she can be recommended as passing student teaching.

(3) Description of the criteria for admission, retention, and exit from the program, including required GPAs and minimum grade requirements for the content courses accepted by the program, not the school, college, or department of education (unless they are the same).

Admission. Formal admission into the dual elementary/special teacher education program is by application. This process may be initiated during or after
courses in the “Pre-Professional Area” are completed. Formal admission is required before courses in the “Academic Support” and “Professional Year” areas can be taken.

Admission requirements include the following criteria:

a. Cumulative grade point average of 2.0 or higher.
b. Completion of the State of Hawaii criminal clearance.
c. A completed graduation plan, or MAP (Major Academic Plan), on file with the Academic Advisor.
d. Successful completion of all courses in the Pre-Professional Area with a C- or higher grade.
e. Passing scores on the PPST: Pre-Professional Skills Test. Each PPST area may only be repeated once, unless special permission is granted by the Program Chair and Dean of the School of Education.
f. A successfully completed application packet for admission into the School of Education.
g. A successful interview with two faculty members from the dual elementary/special education program.
h. Recommendation by faculty in the dual elementary/special education department, based on successful clearance of all items shown.2

Retention. Once formally admitted into the teacher education program, students must maintain what we call “Program Progress” in order to stay in the program. As stated in the university’s general catalog, “...individuals selected for programs in the School of Education must demonstrate the pedagogical skills, content knowledge, and professional dispositions necessary to help all students learn in order to be recommended for graduation and a teaching license. To that end, candidates for graduation and teacher licensing will be carefully assessed throughout their teacher-training program.”3

This assessment of candidates is measured against the following, as noted in the School of Education section of the university’s general catalog:

a. Maintains an overall grade point average of 2.0 or higher.
b. Maintains standards of ENGL 101 in all written work: grammar, spelling, punctuation, usage, vocabulary, pronunciation, and handwriting.
c. Maintains standards of English oral communication.
d. Maintains a professional disposition throughout all education assignments as evidenced (via the Professional Dispositions

2 Brigham Young University Hawaii Bulletin 2005-2006 General Catalog, p. 78.
3 Brigham Young University Hawaii Bulletin 2005-2006 General Catalog, p. 78.
g. Completes all major courses with a C- grade or higher.

f. Completes all required courses with only one repeat in line with University policy.

g. All prior courses must be successfully completed before a student can be admitted to Student Teaching.

h. Student teaching is a fulltime internship experience and students will not be engaged in any other university commitment.4

In addition to the general catalog items noted above, the School of Education has adopted a policy regarding course absences, tardies and late assignments. The School of Education believes these are extensions of the professional dispositions “responsibility,” “attendance” and “punctuality” which are found on the Professional Dispositions Form. These policies are outlined in a handout made available to students in all courses.

Further, the School of Education utilizes a “Yellow Alert” form to document any concern a faculty may have regarding a student in the program. This form is completed by the faculty member who discusses the situation with the student and then forwards the form to the Dean of the School of Education. This allows the Dean to “shepherd” the progress of students. For example, even though our unit is small in number, one faculty member may not realize another faculty member is having a problem with or a concern about the same student. If each faculty member completes the “Yellow Alert Sheet,” once the Dean receives both copies, (s)he can determine what course of action to pursue since the student is evidently exhibiting a “red flag” in more than one course.

Exit. Teacher candidates are informed that in order to be recommended to the Hawaii Teacher Standards Board as a program completer, they must submit a performance portfolio toward the end of the Student Teaching (EDUC 492) semester that documents the following:5

a. Demonstrates the Content Knowledge Requirement

   (1) completion of all general education and religion credits required by the university for the awarding of a baccalaureate degree

   (2) completion of all major course requirements with a C- or higher and maintaining a cumulative grade point average of 2.0 or higher

   (3) demonstrates content competence consistent with the Hawaii Teacher Standards Boards’ Standard V:

   

4 Brigham Young University Hawaii Bulletin 2005-2006 General Catalog, p. 78.

5 Brigham Young University Hawaii School of Education Professional Year Handbook, 2005-2006, pp. 40-41.
Demonstrates Knowledge of Content, meaning the effective teacher consistently demonstrates competency on content area(s) to develop student knowledge and performance, as measured by the following performance criteria:

(a) Keeps abreast of current developments in content area(s)
(b) Teaches mastery of language, complex processes, concepts and principles unique to content area(s)
(c) Connects knowledge of content area(s) to students’ prior experiences, personal interests and real-life situations
(d) Possesses an understanding of technology appropriate to the content area, e.g. computer-assisted instruction

(4) completion of the Educational Testing Service’s Praxis I tests in Reading, Writing and Mathematics with scores that meet the requirements set by the Hawaii Teacher Standards Board
(5) completion of the Educational Testing Service’s Praxis II content area test(s) with scores that meet the requirements set by the Hawaii Teacher Standards Board for the teacher candidate’s major

b. Demonstrates the Pedagogical Skills Requirement:
(1) completion of Observation/Practicum and Student Teaching having successfully demonstrated command of skills consistent with the Hawaii Teacher Standards Boards’ standards as noted below:
(a) I: Focuses on the learner. The effective teacher consistently engages students in appropriate experiences that support their development as independent learners.
(b) II: Creates and maintains a safe and positive learning environment. The effective teacher creates a safe and positive learning environment that encourages social interaction, civic responsibility, active engagement in learning and self-motivation.
(c) III: Adapts to learner diversity. The effective teacher consistently provides opportunities that are inclusive and adapted to diverse learners.
(d) IV: Fosters effective communication in the learning environment. The effective teacher consistently enriches communication in the learning environment.
VI: Designs and provides meaningful learning experiences. The effective teacher consistently plans and implements meaningful learning experiences for students.

VII: Uses active student learning strategies. The effective teacher consistently uses a variety of active learning strategies to develop students’ thinking, problem-solving and learning skills.

VIII: Uses assessment strategies. The effective teacher consistently applies appropriate assessment strategies to evaluate and ensure the continuous intellectual, social, physical and emotional development of the learner.

(2) completion of the Educational Testing Service’s Praxis II pedagogy area test(s) (including the Principles of Learning and Teaching test) with scores that meet the requirements set by the Hawaii Teacher Standards Board for the teacher candidate’s major

c. Demonstrates the Professional Dispositions Requirement
   (1) successfully meet the standard for each of the professional dispositions as defined by the School of Education on its Professional Dispositions Assessment form
   (2) receive a “Pass” on the Observation/Practicum and Student Teaching final reports for Standard IX: Professionalism as defined by the Hawaii Teacher Standards Board

d. Demonstrates the HTSB Standard X Requirement: Fosters Parent and School Community Relationships
   (1) documents collaboration with parents and school community members
   (2) documents efforts to seek opportunities to build strong partnerships with parents and community members
   (3) documents support of activities and programs which encourage parents to participate actively in school-related organizations and activities
   (4) documents efforts to establish open and active lines of communication with parents
   (5) documents utilization of community resources to enhance student learning
   (6) documents opportunities that enhanced professional growth by collaborating with university teacher education faculty
(4) Description of the relationship of the program to the unit's conceptual framework. (Response limited to one page.)

Starting with our mission statement, "...the School of Education prepares quality local and international teachers with the content knowledge, pedagogical skills, and professional dispositions required to meet the needs of students in today's diverse and changing society who teach and model (1) life-long learning and problem-solving abilities; (2) best current educational practices, balanced with gospel principles; and (3) caring, compassionate, and collaborative service in the home, school, church and community." The "content knowledge" part represents the "head" and our program requirements include firm guidelines for this part of the conceptual framework, including grade level requirements and grade point average requirements for general education courses, as well as courses in the major. These requirements are consistent from pre-admission into the program through the exit phase of the program.

The "pedagogical skills" part of the mission statement represents the "hands" and our program requirements are clearly outlined with regard to the demonstration of these skills. From methods courses in each of the subject areas to the portfolio that documents, with clear evidences, the successful utilization and implementation of these skills throughout field experiences, including Student Teaching, these requirements are clearly articulated and well documented.

The "professional dispositions" or "heart" portion of our mission statement are clearly articulated and represent the caring, compassionate, and collaborative nature of the church that sponsors our institution, as well as the general nature of both, the members of the church in general and, the nature of individuals who have chosen teaching as a career path. As Christa McAuliffe stated on behalf of all teachers to the public, "I touch the future . . . I teach."

This recognition of the individual in our quest to "touch the future" by "teaching" is resonated in the central image of the conceptual framework visual --- the learner. Whether by chance or design, the first performance and licensing standard, Focuses on the Learner, is consistent with our program in that everything that is done is done with the learner central to that mission.

The hands which hold the world represent, among other things, the many hands that go into "focusing" on the "learner." The intricate maile and pikake lei which borders the bottom of the conceptual framework represent, like the many hands, the many and varied paths we take in this life, and yet, how we are still intertwined as one in mission and purpose as humans on this planet. Here in the

---

6 Brigham Young University Hawaii Bulletin 2005-2006 General Catalog, p. 77.
School of Education, we work together, many hands, united in one purpose, to prepare our students to “touch the future” through “teaching” the “learners” they will have in their classrooms.

(5) Indication of whether the program has a unique set of program assessments which are different from those expected for the unit’s assessment system and the relationship of the program’s assessments to the unit’s assessment system. This response should clarify how the key assessments used in the program are derived from or informed by the assessment system that the unit will need to address under SATE Unit Standard 2. There are no unique program assessments within the dual elementary/special teacher education program.

Brigham Young University-Hawaii
School of Education
Observation & Participation Evaluation Form

Directions: The objectives of the practicum are closely related to those of the student teaching. Practicum students begin developing skills, knowledge, and attitudes that will be expanded, added to, and refined in student teaching. Therefore, the objectives and evaluation criteria for practicum are based upon the more extensive objectives of student teaching.

Within the limited time available, it is intended that the BYU-Hawaii student will develop the following traits:

I. Focuses on the Learner
   1. Relates instruction to students' interests, experiences and/or real-life situations.
   2. Uses appropriate activities to promote students' successes.
   3. Takes time to listen and respond to students' concerns and interests.
   4. Nurtures students' desire to learn and achieve.
   5. Uses a variety of strategies or activities which recognize the idea of multiple intelligences and learning styles.

Comments:

II. Safe and Positive Learning Environment
   1. Models a caring attitude and promotes mutual respect among students.
   2. Classroom environment is conducive for learning.
   3. Uses appropriate behavior management practices.
   4. Promotes developmentally appropriate learning experiences that enable student success.

Comments:

III. Adapts to Learner Diversity
   1. Adapts instruction to provide for learners' differences in development, multiple intelligence and achievement levels.
   2. Adapts instruction to include learners with special, cultural and linguistic needs, as applicable.
   3. Develops rapport with all students.
   4. Fosters respect and empathy among diverse learners.

Comments:

(NP) Not Passed   (P) Passed

20
IV. Fosters Communication in the Learning Environment

1. Writes and spells in clear standard English.
2. Communicates openly with all students and others working in the learning environment.
3. Uses vocabulary that is appropriate for students' ages and interests.
4. Engages students in different modes of communication.
5. Lesson is engaging and encourages student participation.

Comments:

V. Demonstrates Knowledge of Content

1. Demonstrates knowledge of major concepts and methods in content areas.
2. Connects knowledge of content areas to students' prior experiences, personal interests and real-life situations.
3. Utilizes school's current technologies to facilitate learning in the content areas.

Comments:

VI. Designs and Provides Meaningful Learning Experiences

1. Instructional plan is compatible with the school and system-wide curricular goals.
2. Lesson plan is complete, written and used to guide instruction.
3. Incorporates a variety of appropriate assessment strategies.
4. Lesson plans clearly state connections to the Hawaii Content and Performance Standards.
5. Applies concepts that help students relate learning to everyday life.
6. Lesson is engaging and encourages student participation.

Comments:

VII. Uses Active Student Learning Strategies

1. Helps students to question, problem-solve and access resources.
2. Engages students in active, hands-on, creative, open-ended and problem-based learning experiences.
3. Provides opportunities for students to apply and practice what is learned.
4. Uses school's current technologies as tools for teaching and learning.

Comments:

(NP) Not Passed  (P) Passed
VIII. Uses Assessment Strategies

1. Uses a variety of appropriate assessment strategies.
2. Obtains and uses information about students' experiences, strengths and needs.
3. Engages students in self-assessment activities.
4. Helps keep accurate and updated student records.

Comments:

IX. Demonstrates Professionalism

1. Displays appropriate appearance and evidence of good health practices.
2. Uses initiative in becoming involved in classroom activities.
3. Accepts evaluative feedback professionally and adjusts performance accordingly.
4. Demonstrates good work habits including reliability, punctuality, etc.
5. Displays an appropriate sense of humor.
6. Works collaboratively with other professionals.
7. Student is dressed to a professional standard.

Comments:

X. Fosters Parent and School Community Relationships

1. Utilizes school/community resources to enhance student learning.
2. Works with parents and school personnel to support the learning needs of students.

Comments:

Evaluation Conference

Near the end of the practicum experience, the cooperating teacher should meet with the practicum student to discuss, in general terms at least, the strengths and weaknesses of his/her performance. The conference, as well as prior evaluation conferences, should be based upon the criteria presented in the evaluation form which will be completed by the cooperating teacher and returned to the teacher education program instructor at the end of the practicum.

Hawaii Teacher Standards

I. **Focuses on the learner**
   The effective teacher consistently engages students in appropriate experiences that support their development as independent learners.

II. **Creates and maintains a safe and positive learning environment**
   The effective teacher consistently creates a safe and positive learning environment that encourages interaction, civic responsibility, active engagement in learning and self-motivation.

III. **Adapts to learner diversity**
    The effective teacher consistently provide opportunities that are inclusive and adapted to diverse learners.

IV. **Fosters effective communication in learning environment**
    The effective teacher consistently enriches communication in the learning environment.

V. **Demonstrates knowledge of content**
    The effective teacher consistently demonstrates competency in content area(s) to develop student knowledge and performance.

VI. **Designs and provides meaningful learning experiences**
    The effective teacher consistently plans and implements meaningful learning experiences for students.

VII. **Uses active student learning strategies**
    The effective teacher consistently applies appropriate assessment strategies to evaluate and ensure the continuous intellectual, social, physical and emotional development of the learner.

VIII. **Uses assessment strategies**
     The effective teacher consistently applies appropriate assessment strategies to evaluate and ensure the continuous intellectual, social, physical and emotional development of the learner.

IX. **Demonstrates professionalism**
    The effective teacher continually evaluates the effects of his or her choices and actions and actively seeks opportunities to grow professionally.

X. **Fosters parent & school community relationships**
    The effective teacher establishes and maintains strong working relationships with parents and members of the school community to support student learning.

Student Teaching Final Evaluation
(completed by Cooperating Teacher)
Page 3 of 7

I. Focuses on the Learner
1. Provides opportunities for students to assume responsibility for their own learning.
2. Uses appropriate activities to promote students' interests by nurturing their desire to learn and achieve.
3. Demonstrates concern and interest in students by taking time to listen and respond to them.
4. Relates instruction to students' interests, experiences and/or real-life situations.
5. Facilitates student development of positive self esteem.

Has met standard: Yes No
Comments:

II. Creates and Maintains a Safe and Positive Learning Environment
1. Promotes empathy and mutual respect among students.
2. Knows and follows school/classroom routines & procedures that foster self-control, self-discipline and responsibilities to others.
3. Models a caring attitude.
4. Establishes a positive and appropriate teacher relationship with students.
5. Demonstrates a joy of learning to students.
6. Demonstrates an ability for spontaneous decision-making.
7. Provides learning experiences which engage students as individuals and as members of collaborative groups.

Has met standard: Yes No
Comments:

III. Adapts to Learner Diversity
1. Develops a positive rapport with all students.
2. Designs instruction in response to learners' cultural and linguistic differences.
3. Designs instruction to provide for learners' differences in development, multiple intelligences and achievement levels.
4. Modifies instruction to include learners with special needs, if applicable.
5. Demonstrates commitment to helping every student experience success.

Has met standard: Yes No
Comments:
IV. Fosters Effective Communication in Learning Environment
   1. Speaks clearly and appropriately when communicating with children and with other adults.
   2. Uses a variety of questioning strategies to lead stimulating discussions.
   5. Uses vocabulary that is appropriate for students' ages and interests.
   6. Writes legibly in manuscript or cursive for classroom purposes.
   7. Demonstrates active listening and sensitivity to verbal and nonverbal communication.

Has met standard:  Yes  No

Comments:

V. Demonstrates Knowledge of Content
   1. Demonstrates knowledge of major concepts, content and methods in content areas.
   2. Applies knowledge of methods from education courses to teaching practices.
   3. Connects knowledge of content areas to students' prior experiences, personal interests and real-life situations.

Has met standard:  Yes  No

Comments:

VI. Designs and Provides Meaningful Learning Experiences
   1. Plans and implements logical and sequential lessons that are relevant to learners' needs.
   2. Provides learning experiences and instruction based on curricular goals.
   3. Diagnostic information, tests and other assessment procedures are used in planning.
   4. Links concepts and key ideas to students' prior experiences and understandings.
   5. Provides knowledge/experiences that help students relate learning to everyday life.
   6. Lessons foster higher order thinking skills.
   7. Lesson plans clearly state & teach for mastery of concepts, processes and principles contained in Hawaii's Content and Performance Standards.
   8. Provides knowledge and experiences that help students make life and career decisions.
   9. Utilizes material and equipment to create a media-rich environment.

Has met standard:  Yes  No

University Supervisor's Report of Student Teaching

BRIGHAM YOUNG UNIVERSITY-HAWAII CAMPUS
School of Education
College Report of Student Teaching

Student:

Cooperating School:
District:

Teaching Situation: Grade Level and Subjects Taught

Major: Sem. Cr. Hr

Key to Marking: The boxes to the left of the descriptive statements below represent the full range of quality of performance from the very best to the very worst. Please place an X in the box which best reflects your judgment of the student's overall performance as a student teacher and potential as a teacher.

☐ A performance rarely seen in student teachers; should do a superlative job in teaching.
☐ A performance well above an acceptable standard for student teachers; should do a very good job in teaching.
☐ An acceptable standard of performance for student teachers; should do a good job of teaching.
☐ A performance less than an acceptable standard for student teacher; help and supervision will be needed during initial teaching.
☐ A wholly unacceptable performance as a student teacher. Not recommended for employment as a teacher.

Summary Statement & Analytical Comment

University Supervisor: ___________________________ Signature: ___________________________ Date
Purpose: The purpose of this portfolio is for you to demonstrate how your effectiveness as a teacher in the Hawaii Teacher Performance and Licensing Standards and your implementation of the Hawaii Content Performance Standards has had an impact on the learners in your classroom. This is a step beyond the formal observations that have been done during your classroom teaching and is a component of the evaluation process that demonstrates your knowledge, skills, and dispositions as a teacher candidate in the BYUH School of Education.

Directions: Carefully select evidence that demonstrates your competence as a teacher and the effects you've had on your students’ learning. (** Please remember that any artifact that is considered confidential should have all identifying information removed). Then write a personal statement for each standard explaining how you've met the standard based on the evidence provided. When preparing this statement, you will need to reflect on the performance criteria that is included under each standard. Your evidence should support these (some if not all) performance criteria and not just the broad standard.

I. Focuses on the learner
The effective teacher consistently engages students in appropriate experiences that support their development as independent learners.

   Evidence to demonstrate this standard may include (but are not limited to) two or more of the following:

   • Lesson plans
   • Lesson plans showing connections to IEP’s
   • Student work with teacher feedback
   • Student journals
   • Reading Logs

   Has met standard: Yes [ ] No [ ]

   Comments:

II. Creates and maintains a safe and positive learning environment
The effective teacher consistently creates a safe and positive learning environment that encourages interaction, civic responsibility, active engagement in learning and self-motivation.

   Evidence to demonstrate this standard may include (but are not limited to) two or more of the following:

   • Lesson plans
   • Tribes Lessons
   • Cooperative Learning Lessons
   • Photographs
   • Videos
   • Copies of posted rules and consequences
   • Copies of behavioral intervention plans, contracts, Functional Behavioral Analysis, etc.

   Has met standard: Yes [ ] No [ ]

   Comments:
III. Adapts to learner diversity
The effective teacher consistently provides opportunities that are inclusive and adapted to diverse learners.

_Evidence to demonstrate this standard may include (but are not limited to) two or more of the following:_

- Lesson plans
- Tribes lessons
- Lessons utilizing multiple intelligences
- Computer searches
- Resource Bibliographies
- Pre-test/Post-test comparison data
- Student work with teacher feedback
- Photographs

Has met standard: Yes [ ] No [ ]

Comments:

IV. Fosters effective communication in learning environment
The effective teacher consistently enriches communication in the learning environment.

_Evidence to demonstrate this standard may include (but are not limited to) two or more of the following:_

- Lesson plans
- Videos
- Student work
- Examples of teacher made visuals
- Photographs

Has met standard: Yes [ ] No [ ]

Comments:

V. Demonstrates knowledge of content
The effective teacher consistently demonstrates competency in content area(s) to develop student knowledge and performance.

_Evidence to demonstrate this standard may include (but are not limited to) two or more of the following:_

- Lesson plans
- Computer searches
- Student work
- Photographs
- Meeting/Conference handouts

Has met standard: Yes [ ] No [ ]

Comments:
VI. Designs and provides meaningful learning experiences
The effective teacher consistently plans and implements meaningful learning experiences for students.

Evidence to demonstrate this standard may include (but are not limited to) some of the following:

- Lesson plans/unit plans
- Graphic organizers
- Outcomes of projects
- Photographs
- Pre-test/Post-test data
- Examples of rubrics and graded student work

Has met standard: Yes ___ No ___
Comments:  

VII. Uses active student learning strategies
The effective teacher consistently uses a variety of active learning strategies to develop students’ thinking, problem-solving and learning skills.

Evidence to demonstrate this standard may include (but are not limited to) some of the following:

- Lesson plans
- Photographs
- Student work
- Student projects: plans & examples

Has met standard: Yes ___ No ___
Comments:  

VIII. Uses assessment strategies
The effective teacher consistently applies appropriate assessment strategies to evaluate and ensure the continuous intellectual, social, physical and emotional development of the learner.

Evidence to demonstrate this standard may include (but are not limited to) some of the following:

- Lesson plans
- Student portfolios
- Gradebook
- Pre-test/Post-test data
- Notes/Letters to parents etc.
- Student work with rubrics and written evaluation
- Student journals

Has met standard: Yes ___ No ___
Comments:  

33
IX. **Demonstrates professionalism**
The effective teacher continually evaluates the effects of his or her choices and actions and actively seeks opportunities to grow professionally.

*Evidence to demonstrate this standard may include (but are not limited to) some of the following:*

- Meeting/Conference handouts
- List of professional books and journals read
- Examples of team projects
- List of school activities you've participated in
- Formal evaluations demonstrating implementation of feedback
- Journal entries
- Curriculum alignment
- Grade level planning
- Professional memberships

Has met standard: Yes [ ] No [ ]
Comments: ________________________________

X. **Fosters parent & school community relationships**
The effective teacher establishes and maintains strong working relationships with parents and members of the school community to support student learning.

*Evidence to demonstrate this standard may include (but are not limited to) some of the following:*

- Record of IEP participation
- Notes/Letters written to parents etc.
- Notes/letters received from parents etc.

Has met standard: Yes [ ] No [ ]

Attachment 2.7
Employment Portfolio Evaluation

Employment Portfolio Evaluation Form

Teacher Candidate's Name: ____________________________
Evaluator's Name: ____________________________

The Employment Portfolio is due at the end of Student Teaching. It is to your advantage to begin thinking about it at the beginning of O&P so that selected samples of student's work, photographs of bulletin boards and student activities can be collected throughout the year. The employment portfolio must include the following:

- a one page resume using a professional looking font and printed on bond paper
- a statement of your philosophy of education
- a statement of your philosophy of discipline
- letters of recommendation (no more than 3)
- lesson plan(s) corresponding to each evaluation
- an IEP you've written (for special education and dual licensing majors only)
- list of the education classes you've taken and any other relevant coursework
- photographs of students working and/or bulletin boards

Additional items to be included in your portfolio (at least 3 of the following):

- honors and awards you've received
- previous certifications and diplomas
- history/information of your school (O&P/Student Teaching)
- other documentation attesting to your teaching abilities
- examples of student work
- examples of significant teaching materials you have produced
- a video of your teaching

Presentation format guidelines: use sheet protectors and a new, professional-looking binder

IV. Evidence for Meeting Standards

I. Focuses on the Learner: The effective teacher candidate consistently engages students in appropriate experiences that support their development as independent learners.

A. Assessment #3: Program Checklist. The Pre-Professional Area Courses taken by teacher education students includes EDU 212: Foundations of Education. Teacher education students are presented information related to how children learn and develop and how to utilize that knowledge in providing learning opportunities to support students' intellectual, social and personal development. The course also explains how students differ in their approaches to learning and how to create instructional activities that are adapted to diverse learners. In the SPED 200: Education of Exceptional Students course, teacher education students are presented information related to individual students who are identified in any of the exceptional categories. Students must successfully complete all courses in this area with a C- or higher grade and meet all professional dispositions in order to continue in the program.

Teacher education students who are formally admitted into the School of Education continue with the Academic Support Area Courses. In the EDU 300: Human Growth and Learning course, teacher education students take the principles learned in PSYC 111: General Psychology and expand them into an application of those principles in the teaching/learning setting in the classroom. The EDU 312: Effective Pedagogy course addresses the specific teacher pedagogy skills needed by effective teachers, including lesson planning and lesson delivery. The EDU 385: Education Assessment in the Classroom course targets assessment for individual students. The EDU 305: Computer Technology Assisted Instruction course focuses on creating lessons with appropriate technology that engage the K-6 students in the learning process. All other Academic Support Area courses are methods courses for specific content areas: Art (ART 336), Science (ELED 360), Music (ELED 378), Social Studies (ELED 380), Health (HLTH 361), and Physical Education (EXS 375). These methods courses emphasize an understanding of the content area, but their primary focus is on delivery of that content in the elementary classroom. The most current, research-based pedagogy is the goal of each of these courses. Students must successfully complete all courses in this area with a C- or higher grade and meet all professional dispositions in order to continue in the program.

The third phase of courses taken by teacher candidates is known as the Professional Year Courses. Courses in this phase include the remaining content area methods courses: Language Arts (ELED 320), Reading (ELED 321), and Mathematics (ELED 351). Students must successfully complete all courses in this area with a C- or higher grade and meet all professional dispositions in order to continue in the program.
The Program Checklist is utilized to track the progress of teacher candidates in the program. It contains a list of each of the required courses in the program and has a column to show the grade obtained in each course. Teacher candidates must earn a C- or higher in each and every course in order to advance from the Pre-Professional phase to the Academic Support Area phase to the culminating Professional Year phase.

B. Assessment #4: Professional Year Observation & Participation Final Evaluation. During the teacher candidate’s semester of O&P, every lesson taught is evaluated using the School of Education’s “O&P Lesson Observation Form.”17 Alignment of items on the observation form associated with this standard are shown in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The performance standard and corresponding indicators appear in the right column.

<table>
<thead>

The formative data collected from the observations is used to complete the

---

17 See Attachment 4.1
"Observation and Participation Evaluation Form." Teacher candidates must receive a "Pass" rating by their Cooperating Teacher and the university faculty in these standards, as well as the other standards, and meet the standard for all professional dispositions in order to advance to student teaching.

It should be noted that under our philosophy of pass/not pass, or stated another way, meets the standard/does not meet the standard, teacher candidates understand that they must be able to demonstrate all required competencies as measured on the assessment instruments in O&P and Student Teaching in order to continue in the program and eventually become a program completer. Following legal counsel, several years ago it was decided to shade the "I" rating on the lesson observation forms. The legal counsel was to make sure teacher candidates clearly understood that a "I" rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the "I" rating that appears on the bottom of the observation forms reads: "Does not meet Standard."

This does not mean to imply that teacher candidates do not get any "I's" during O&P or Student Teaching. They do. However, they understand that they must work towards removing those "I's" as they continue in the program. They understand that the consequence is serious --- not being a program completer.

Teacher candidates must receive a "Met Standard" rating by their Cooperating Teacher and the university faculty in all ten of the standards and meet all School of Education professional dispositions in order to continue in the program.

C. Assessment #5: Professional Year Student Teaching Final Evaluation.
During the teacher candidate's semester of Student Teaching, like O&P, every evaluated lesson taught uses the School of Education's "Student Teaching Lesson Observation Form." Alignment of items on the observation form associated with this standard are shown in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The performance standard and corresponding indicators appear in the right column.

<table>
<thead>

<td></td>
</tr>
</tbody>
</table>

18 See Attachment 2.4
19 See Attachments 4.1 and 4.3
20 See Attachment 4.2
21 See Attachment 4.3
The formative data collected from the observations is used to complete the “Observation and Participation Evaluation Form.” Teacher candidates must receive a “Pass” rating by their Cooperating Teacher and the university faculty in these standards, as well as the other standards, and meet the standard for all professional dispositions in order to advance to student teaching.

It should be noted that under our philosophy of pass/not pass, or stated another way, meets the standard/does not meet the standard, teacher candidates understand that they must be able to demonstrate all required competencies as measured on the assessment instruments in O&P and Student Teaching in order to continue in the program and eventually become a program completer. Following legal counsel, several years ago it was decided to shade the “I” rating on the lesson observation forms. The legal counsel was to make sure teacher candidates clearly understood that a “I” rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the “I” rating that appears on the bottom of the observation forms reads: “Does not meet Standard.”

This does not mean to imply that teacher candidates do not get any “I’s” during O&P or Student Teaching. They do. However, they understand that they

---

22 See Attachment 2.4
23 See Attachments 4.1 and 4.3
must work towards removing those “1’s” as they continue in the program. They understand that the consequence is serious --- not being a program completer.

Teacher candidates must receive a “Met Standard” rating by their Cooperating Teacher and the university faculty in all ten of the standards and meet all School of Education professional dispositions\textsuperscript{24} in order to continue in the program.

D. Assessment #6: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty using the “Professional Outcomes Portfolio Evaluation Form.”\textsuperscript{25} Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard I: Focuses on the Learner, the following suggested evidences for demonstrating this standard include: lesson plans, lesson plans showing connections to IEP’s, lesson observation comments by evaluators, student work with teacher feedback, student journals, reading logs, photographs, personal statement(s), and any other item(s) the teacher candidate might consider appropriate.

Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

Teacher candidates must receive a “Met Standard” on each of the ten standards for the portfolio. If any area is deemed below standard, the teacher candidate must continue working on the portfolio until the university faculty consider it at an acceptable standard for someone desiring to be a program completer.

\textsuperscript{24} See Attachment 4.2
\textsuperscript{25} See Attachment 2.7
II. Creates and Maintains a Safe and Positive Learning Environment. The effective teacher candidate consistently creates a safe and positive learning environment that encourages social interaction, civic responsibility, active engagement in learning and self-motivation.

A. Assessment #4: Professional Year Observation & Participation Final Evaluation. During the teacher candidate’s semester of O&P, every lesson taught is evaluated using the School of Education’s “O&P Observation Form.” Alignment of items on the observation form associated with this standard are shown in the following table. Lesson engages and encourages student participation (B9)  
- Modifications made for learning needs of individual students are noted in lesson plan (B15)  
- Uses strategies to include the reticent learner (D2)

(7) Provides learning experiences which engage students as individuals and as members of collaborative groups

The formative data collected from the observations is used to complete the "Student Teaching Evaluation Form." Teacher candidates must receive a "Pass" rating by their Cooperating Teacher and the university faculty in these standards, as well as the other standards, and meet the standard for all professional dispositions in order to advance to student teaching.

It should be noted that under our philosophy of pass/not pass, or stated another way, meets the standard/does not meet the standard, teacher candidates understand that they must be able to demonstrate all required competencies as measured on the assessment instruments in O&P and Student Teaching in order to continue in the program and eventually become a program completer. Following legal counsel, several years ago it was decided to shade the "1" rating on the lesson observation forms. The legal counsel was to make sure teacher candidates clearly understood that a "1" rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the "1" rating that appears on the bottom of the observation forms reads: "Does not meet Standard."

This does not mean to imply that teacher candidates do not get any "1's" during O&P or Student Teaching. They do. However, they understand that they must work towards removing those "1's" as they continue in the program. They understand that the consequence is serious --- not being a program completer.

Teacher candidates must receive a "Met Standard" rating by their Cooperating Teacher and the university faculty in all ten of the standards and meet all School of Education professional dispositions in order to continue in the program.

C. Assessment #6: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use

31 See Attachment 2.4
32 See Attachments 4.1 and 4.3
33 See Attachment 4.2
as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard II: Creates and Maintains a Safe and Positive Learning Environment, the following suggested evidences for demonstrating this standard include: lesson plans; Tribes lesson plans; Cooperative Learning lesson plans; lesson observation comments by evaluators; photographs; videos; copies of posted rules and consequences; copies of behavioral intervention plans, contracts, functional behavioral analysis, etc.; personal statement(s), and any other item(s) the teacher candidate might consider appropriate. Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

III. Adapts to Learner Diversity. The effective teacher candidate consistently provides opportunities that are inclusive and adapted to diverse learners.

A. Assessment #4: Professional Year Observation & Participation Final Evaluation. During the teacher candidate’s semester of O&P, every lesson taught is evaluated using the School of Education’s “O&P Observation Form.” Alignment of items on the observation form associated with this standard are shown in the following table. Following legal counsel, several years ago it was decided to shade the "1/1" rating on the lesson observation forms. The legal counsel was to make sure teacher candidates clearly understood that a "1" rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the "1" rating that appears on the bottom of the observation forms reads: "Does not meet Standard."

This does not mean to imply that teacher candidates do not get any "1's" during O&P or Student Teaching. They do. However, they understand that they must work towards removing those "1's" as they continue in the program. They understand that the consequence is serious --- not being a program completer.

Teacher candidates must receive a "Met Standard" rating by their Cooperating Teacher and the university faculty in all ten of the standards and meet all School of Education professional dispositions in order to continue in the program.

B. Assessment #5: Professional Year Student Teaching Final Evaluation.
During the teacher candidate's semester of Student Teaching, like O&P, every lesson taught is evaluated using the School of Education's "Student Teaching Observation Form." Alignment of items on the observation form associated with this standard

The formative data collected from the observations is used to complete the “Student Teaching Final Evaluation Form.”39 Teacher candidates must receive a “Pass” rating by their Cooperating Teacher and the university faculty in these standards, as well as the other standards, and meet the standard for all professional dispositions in order to advance to student teaching.

It should be noted that under our philosophy of pass/not pass, or stated another way, meets the standard/does not meet the standard, teacher candidates understand that they must be able to demonstrate all required competencies as measured on the assessment instruments in O&P and Student Teaching in order to

39 See Attachment 2.4
continue in the program and eventually become a program completer. Following legal counsel, several years ago it was decided to shade the “1” rating on the lesson observation forms. The legal counsel was to make sure teacher candidates clearly understood that a “1” rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the “1” rating that appears on the bottom of the observation forms reads: “Does not meet Standard.”

This does not mean to imply that teacher candidates do not get any “1’s” during O&P or Student Teaching. They do. However, they understand that they must work towards removing those “1’s” as they continue in the program. They understand that the consequence is serious --- not being a program completer.

Teacher candidates must receive a “Met Standard” rating by their Cooperating Teacher and the university faculty in all ten of the standards and meet all School of Education professional dispositions in order to continue in the program.

C. Assessment #6: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard III: Adapts to Learner Diversity, the following suggested evidences for demonstrating this standard include: lesson plans, Tribes lesson plans, lessons utilizing multiple intelligences, lesson observation comments by evaluators, computer searches, resource bibliographies, pre-test/post-test comparison data, student work with teacher feedback, photographs, personal statement(s), and any other item(s) the teacher candidate might consider appropriate.

Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they

Teacher candidates must receive a “Met Standard” rating by their Cooperating Teacher and the university faculty in all ten of the standards and meet all School of Education professional dispositions in order to continue in the program.

C. Assessment #6: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard IV: Fosters Effective Communication in the Learning Environment, the following suggested evidences for demonstrating this standard include: lesson plans, videos, student work, lesson observation comments by evaluators, examples of teacher made visuals, photographs, personal statement(s), and any other item(s) the teacher candidate might consider appropriate. Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

---

48 See Attachments 4.1 and 4.3
49 See Attachment 4.2
V. Demonstrates Knowledge of Content. The effective teacher candidate consistently demonstrates competency in content area(s) to develop student knowledge and performance.

V.1: Keeps abreast of current developments in content area(s) by demonstrating that he/she knows his/her discipline and understands how knowledge in the discipline is created, organized, and linked to other disciplines.

A. Assessment #3: Program Checklist. This “checklist” is an assessment of the progress teacher candidates make in completing the three phases of coursework in the program. In the first phase of courses, called Pre-Professional Area Courses, teacher candidates demonstrate in the EDU 212: Foundations of Education course, that they understand how children learn and develop and how to utilize that knowledge in providing learning opportunities to support students’ intellectual, social and personal development. This study includes the work of theorists such as Jean Piaget and Maria Montessori. The course also explains how students differ in their approaches to learning and how to create instructional activities that are adapted to diverse learners. Theorists such as Howard Gardner are considered, along with those advocates of behaviorism and constructivism. Competence in this area is measured through in-class activities as observed by the instructor, chapter tests and a ten to twenty hour field experience in a local elementary school where the teacher candidate tutors one or more students in a K-6 classroom. In addition, in the SPED 200: Education of Exceptional Students course, teacher education students are presented information related to individual students who are identified in any of the exceptional categories.

Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program. The “C-” grade has been designated by the university as an acceptable passing grade in an effort to minimize grade inflation. In the School of Education, in support of the university’s decision, we interpret the C- as an acceptable standard of performance. In theory, it would be equated to Charlotte Danielson’s rating of “basic” in the domain rubrics contained in her book A Framework for Teaching. Following that train of thought, the B grades would equate to Danielson’s rubric rating of “proficient” and A grades would equate to “distinguished.” If teacher candidates make below a C- in a major course, they have one opportunity to repeat the course and remain in the teacher education program.

In addition to the grade requirement, teacher candidates must also receive a “met” in each of the eleven professional dispositions adopted by the School of
Education. This is determined by the “Professional Dispositions Assessment”\textsuperscript{50} form developed by the School of Education and after discussing any concerns as a faculty about any teacher candidate.

The next phase of courses in this assessment process is called Academic Support Area Courses. In the EDU 300: Human Growth and Learning course, teacher candidates take the principles learned in PSYC 111: General Psychology and expand them into an application of those principles in the teaching/learning setting in the classroom. The EDU 312: Effective Pedagogy course addresses the specific teacher pedagogy skills needed by effective teachers, including lesson planning and lesson delivery. The EDU 385: Education Assessment in the Classroom course targets assessment for individual students. The EDU 305: Computer Technology Assisted Instruction course focuses on creating lessons with appropriate technology that engage the K-6 students in the learning process. All other Academic Support Area courses are methods courses for specific content areas: Art (ART 336), Science (ELED 360), Music (ELED 378), Social Studies (ELED 380), Health (HLTH 361), and Physical Education (EXS 375). These methods courses emphasize an understanding of the content area, but their primary focus is on delivery of that content in the elementary classroom. The most current, research-based pedagogy is the goal of each of these courses.

Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

The final phase of course work is called Professional Year Courses. Courses in this phase of the program include the remaining content area methods courses: Language Arts (ELED 320), Reading (ELED 321), and Mathematics (ELED 351). While the emphasis is on pedagogy in these core content areas, content is integral to each course to ensure the most current curriculum standards are taught.

As stated before, teacher candidates must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

B. Assessment #4: Professional Year Observation & Participation Final Evaluation. During the teacher candidate’s semester of O&P, every evaluated lesson taught uses the School of Education’s “O&P Observation Form.”\textsuperscript{51} Alignment of items on the observation form associated with this standard are shown in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The performance standard and corresponding

\textsuperscript{50} See Attachment 4.2
\textsuperscript{51} See Attachment 4.1
indicators appear in the right column.

<table>
<thead>
<tr>
<th>Lesson Observation Form</th>
<th>Performance Standard V.1: Keeps abreast of current developments in content area(s) ...</th>
</tr>
</thead>
<tbody>
<tr>
<td>• connects concepts to prior knowledge and experiences (B4)</td>
<td>(5) Applies concepts that help students relate learning to everyday life</td>
</tr>
<tr>
<td>• presents instruction clearly and understandably to students (B6)</td>
<td>(6) Lesson is engaging and encourages student participation</td>
</tr>
</tbody>
</table>

The formative data collected from the observations is used to complete the "Observation and Participation Evaluation Form." Teacher candidates must receive a "Pass" rating by their Cooperating Teacher and the university faculty in these standards, as well as the other standards, and meet the standard for all professional dispositions in order to advance to student teaching.

It should be noted that under our philosophy of pass/not pass, or stated another way, meets the standard/does not meet the standard, teacher candidates understand that they must be able to demonstrate all required competencies as measured on the assessment instruments in O&P and Student Teaching in order to continue in the program and eventually become a program completer. Following legal counsel, several years ago it was decided to shade the "1" rating on the lesson observation forms. The legal counsel was to make sure teacher candidates clearly understood that a "1" rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the "1" rating that appears on the bottom of the observation forms reads: "Does not meet Standard."

This does not mean to imply that teacher candidates do not get any "1's" during O&P or Student Teaching. They do. However, they understand that they must work towards removing those "1's" as they continue in the program. They understand that the consequence is serious --- not being a program completer.

C. Assessment #5: Professional Year Student Teaching Final Evaluation.

During Student Teaching, the "Student Teaching Observation Form" is used. The only difference in it and the observation form used in O&P is the addition of a rating of "3" on the form. The "3" is coded as "Distinguished" and is intended to be used in cases where the teacher candidate has truly "distinguished" himself/herself in performing that teaching behavior/practice as a seasoned classroom teacher. Otherwise, the "2" rating is used to assess the teacher candidate as having "met" the standard, while the "1" rating is used to identify performance that "does not meet

---

52 See Attachment 2.4
53 See Attachments 4.1 and 4.3
54 See Attachment 4.3
The formative data collected from these observations is used to complete the “Year End Student Teaching Evaluation Form.” Teacher candidates must receive a “Has met standard” rating by their Cooperating Teacher and the university faculty in this Standard.

D. **Assessment #6: Performance Outcomes Portfolio.** Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard V: Demonstrates Knowledge of Content, the following suggested evidences for demonstrating this standard include: lesson plans, computer searches, student work, lesson observation comments by evaluators, photographs, list of course work, meeting/conference handouts, personal statement(s), and any other item(s) the teacher candidate might consider appropriate.

Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

Teacher candidates must receive a “Met Standard” on each of the ten standards for the portfolio. If any area is deemed below standard, the teacher candidate must continue working on the portfolio until the university faculty consider it at an acceptable standard for someone desiring to be a program completer.

E. **Assessment #8: Praxis II and PLT, K-6.** One of the requirements to be a program completer includes having passed the Praxis II tests and the PLT, K-6.

---

55 See Attachment 2.5
56 See Attachment 2.7
These scores must be on file with the School of Education and the pass score used is that set by the state licensing agency, the Hawaii Teacher Standards Board.

The Educational Testing Service, publisher of the Praxis Series of tests gives the following explanation for each of the tests assessed in this category:

**Special Education Core Principles: Content Knowledge (0353):**
- the test is designed to measure the candidates understanding of exceptionalities and delivery of services to students with disabilities
- the candidates understanding of causation and the prevention of disabilities is measured
- questions require the candidate to understand the nature of behaviors, including frequency, duration, intensity and degrees of severity

**Principles of Learning and Teaching: Grades K-6 (0522):**
- test is designed to assess a beginning teacher’s knowledge of a variety of job-related criteria
- questions may require the examinee to do any of the following: demonstrate understanding of the importance of an aspect of teaching, demonstrate understanding of the principles of learning and teaching underlying an aspect of teaching, or recognize when and how to apply the principles of learning and teaching underlying an aspect of teaching.

---

**V.2: Teaches mastery of language, complex processes, concepts and principles unique to content area(s) by demonstrating that he/she:**
(a) designs instruction that addresses the core skills, concepts, and ideas of the discipline to help students meet the goals of the Hawaii Content and Performance Standards System and General Learner Outcomes,
(b) selects instructional materials and resources based on their comprehensiveness, accuracy, and usefulness for representing particular ideas and concepts and
(c) represents and uses differing viewpoints, theories, and methods of inquiry when teaching concepts of the discipline.

---

**A. Assessment #1: Praxis I Reading, Writing and Mathematics.** Passing these three assessments is considered essential in measuring basic core skills in those three critical content areas. Although it is only one of several items contained in the complete admissions process into the teacher education program, without passing scores, the applicant may not proceed in the School of Education as a teacher candidate.

**B. Assessment #3: Program Checklist.** This “checklist” is an assessment of the progress teacher candidates make in completing the three phases of coursework in the program. In the first phase of courses, called Pre-Professional Area Courses, teacher candidates demonstrate in the EDU 212: Foundations of Education course, that they understand how children learn and develop and how to utilize that knowledge in providing learning opportunities to support students’ intellectual, social and personal development. This study includes the work of theorists such as Jean Piaget and Maria Montessori. The course also explains how students differ in their approaches to learning and how to create instructional activities that are adapted to diverse learners. Theorists such as Howard Gardner are considered, along with those advocates of behaviorism and constructivism. Competence in this area is measured through in-class activities as observed by the instructor, chapter tests and a ten to twenty hour field experience in a local elementary school where the teacher candidate tutors one or more students in a K-6 classroom. In addition, in the SPED 200: Education of Exceptional Students course, teacher education students are presented information related to individual students who are identified in any of the exceptional categories.

Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program. The “C-” grade has been designated by the university as an acceptable passing grade in an effort to minimize grade inflation. In the School of Education, in support of the university’s decision, we interpret the C- as an acceptable standard of performance. In theory, it would be equated to Charlotte Danielson’s rating of “basic” in the domain rubrics contained in her book *A Framework for Teaching*. Following that train of thought, the B grades would equate to Danielson’s rubric rating of “proficient” and A grades would equate to “distinguished.” If teacher candidates make below a C- in a major course, they have one opportunity to repeat the course and remain in the teacher education program.

In addition to the grade requirement, teacher candidates must also receive a “met” in each of the eleven professional dispositions adopted by the School of Education. This is determined by the “Professional Dispositions Assessment” form developed by the School of Education and after discussing any concerns as a faculty about any teacher candidate.

The next phase of courses in this assessment process is called Academic Support Area Courses. In the EDU 300: Human Growth and Learning course, teacher candidates take the principles learned in PSYC 111: General Psychology and

---

59 See Attachment 4.2
expand them into an application of those principles in the teaching/learning setting in the classroom. The EDU 312: Effective Pedagogy course addresses the specific teacher pedagogy skills needed by effective teachers, including lesson planning and lesson delivery. The EDU 385: Education Assessment in the Classroom course targets assessment for individual students. The EDU 305: Computer Technology Assisted Instruction course focuses on creating lessons with appropriate technology that engage the K-6 students in the learning process. All other Academic Support Area courses are methods courses for specific content areas: Art (ART 336), Science (ELED 360), Music (ELED 378), Social Studies (ELED 380), Health (HLTH 361), and Physical Education (EXS 375). These methods courses emphasize an understanding of the content area, but their primary focus is on delivery of that content in the elementary classroom. The most current, research-based pedagogy is the goal of each of these courses.

Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

The final phase of course work is called Professional Year Courses. Courses in this phase of the program include the remaining content area methods courses: Language Arts (ELED 320), Reading (ELED 321), and Mathematics (ELED 351). While the emphasis is on pedagogy in these core content areas, content is integral to each course to ensure the most current curriculum standards are taught.

As stated before, teacher candidates must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

C. Assessment #4: Professional Year Observation & Participation Final Evaluation. During the teacher candidate’s semester of O&P, every evaluated lesson taught uses the School of Education’s “O&P Observation Form.” Items on the observation form are aligned with the corresponding performance standard(s) in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The applicable performance standards and corresponding indicators appear in the right column.

<table>
<thead>
<tr>
<th>Lesson Observation Form</th>
<th>Performance Standard V.2: Teaches mastery of language, complex processes, concepts and principles unique to content area(s) . . .</th>
</tr>
</thead>
</table>

---

60 See Attachment 4.1
The formative data collected from the observations is used to complete the sections indicated in the table on the “Observation and Participation Evaluation Form.” Teacher candidates must receive a “Pass” rating by their Cooperating Teacher and the university faculty in this Standard, as well as the other standards, and meet the standard for all professional dispositions in order to advance to student teaching.

It should be noted that under our philosophy of pass/not pass, or stated another way, meets the standard/does not meet the standard, teacher candidates understand that they must be able to demonstrate all required competencies as measured on the assessment instruments in O&P and Student Teaching in order to continue in the program and eventually become a program completer. Following legal counsel, several years ago it was decided to shade the “I” rating on the lesson

---

See Attachment 2.4
observation forms. The legal counsel was to make sure teacher candidates clearly understood that a "1" rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the "1" rating that appears on the bottom of the observation forms reads: "Does not meet Standard."

This does not mean to imply that teacher candidates do not get any "1's" during O&P or Student Teaching. They do. However, they understand that they must work towards removing those "1's" as they continue in the program. They understand that the consequence is serious --- not being a program completer.

D. **Assessment #5: Professional Year Student Teaching Final Evaluation.**

During Student Teaching, the "Student Teaching Observation Form" is used. The only difference in it and the observation form used in O&P is the addition of a rating of "3" on the form. The "3" is coded as "Distinguished" and is intended to be used in cases where the teacher candidate has truly "distinguished" himself/herself in performing that teaching behavior/practice as a seasoned classroom teacher. Otherwise, the "2" rating is used to assess the teacher candidate as having "met" the standard, while the "1" rating is used to identify performance that "does not meet the standard."

The formative data collected from these observations is used to complete Section V: Demonstrates Knowledge of Content on the "Year End Student Teaching Evaluation Form." Teacher candidates must receive a "Has met standard" rating by their Cooperating Teacher and the university faculty in this Standard.

E. **Assessment #6: Performance Outcomes Portfolio.** Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard V: Demonstrates Knowledge of Content, the following suggested evidences for demonstrating this standard include:

65 See Attachment 2.7
plans, computer searches, student work, lesson observation comments by evaluators, photographs, list of course work, meeting/conference handouts, personal statement(s), and any other item(s) the teacher candidate might consider appropriate.

Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

Teacher candidates must receive a “Met Standard” on each of the ten standards for the portfolio. If any area is deemed below standard, the teacher candidate must continue working on the portfolio until the university faculty consider it at an acceptable standard for someone desiring to be a program completer.

F. Assessment #8: Praxis II and PLT, K-6. One of the requirements to be a program completer includes having passed the Praxis II tests and the PLT, K-6. These scores must be on file with the School of Education and the pass score used is that set by the state licensing agency, the Hawaii Teacher Standards Board.

The Educational Testing Service, publisher of the Praxis Series of tests gives the following explanation for each of the tests assessed in this category:

Special Education Core Principles: Content Knowledge (0353):66
- the test is designed to measure the candidates understanding of exceptionalities and delivery of services to students with disabilities
- the candidates understanding of causation and the prevention of disabilities is measured
- questions require the candidate to understand the nature of behaviors, including frequency, duration, intensity and degrees of severity

Principles of Learning and Teaching: Grades K-6 (0522):67
- test is designed to assess a beginning teacher’s knowledge of a variety of job-related criteria
- questions may require the examinee to do any of the following: demonstrate understanding of the importance of an aspect of teaching,

66Educational Testing Service (ets.org). The Praxis Series TSTests at a Glance. About This Test in “Special Education Core Principles: Content Knowledge (0353).”
67Educational Testing Service (ets.org). The Praxis Series TSTests at a Glance. About This Test in “Principles of Learning and Teaching: Grades K-6 (0522).”
demonstrate understanding of the principles of learning and teaching underlying an aspect of teaching, or recognize when and how to apply the principles of learning and teaching underlying an aspect of teaching.

V.3: Possesses an understanding of technology appropriate to the content area, e.g., computer assisted instruction and utilizes the school’s current technologies to facilitate learning in the content area(s) by demonstrating that he/she incorporates appropriate technological resources to support student exploration of the disciplines.

A. Assessment #4: Professional Year Observation & Participation Final Evaluation. During the teacher candidate’s semester of O&P, every evaluated lesson taught uses the School of Education’s “O&P Observation Form.” Item(s) related to Standard V.3 are not specifically found on the lesson observation form. However, the Cooperating Teacher makes a “cumulative” assessment of the use of technology over the semester in order to complete Standard VII: Uses Active Student Learning Strategies, item #4, Uses school’s current technologies as tools for teaching and learning on the O&P Final Evaluation Form.

B. Assessment #5: Professional Year Student Teaching Final Evaluation. As with the O&P Semester explained above, during Student Teaching, the lesson observation form does not specifically address the use of technology in lessons. However, the Cooperating Teacher makes a “cumulative” assessment of the use of technology over the semester in order to complete Standard VII: Uses Active Student Learning Strategies, item #7, Uses available technologies as tools for teaching and learning on the Student Teaching Final Evaluation Form.

C. Assessment #6: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard VII: Uses Active Student Learning Strategies, the following suggested evidences for demonstrating the technology portion of this standard include: lesson plans/unit plans, outcomes of projects (samples), lesson

---

68 See Attachment 4.1
69 See Attachment 2.7
observation comments by evaluators, photographs, examples of rubrics and graded student work, personal statement(s), and any other item(s) the teacher candidate might consider appropriate.

Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

Teacher candidates must receive a “Met Standard” on each of the ten standards for the portfolio. If any area is deemed below standard, the teacher candidate must continue working on the portfolio until the university faculty consider it at an acceptable standard for someone desiring to be a program completer.

D. Assessment #8: Praxis II and PLT, K-6. One of the requirements to be a program completer includes having passed the Praxis II tests and the PLT, K-6. These scores must be on file with the School of Education and the pass score used is that set by the state licensing agency, the Hawaii Teacher Standards Board.

The Educational Testing Service, publisher of the Praxis Series of tests gives the following explanation for each of the tests assessed in this category:

Special Education Core Principles: Content Knowledge (0353):70
- the test is designed to measure the candidates understanding of exceptionalities and delivery of services to students with disabilities
- the candidates understanding of causation and the prevention of disabilities is measured
- questions require the candidate to understand the nature of behaviors, including frequency, duration, intensity and degrees of severity

Principles of Learning and Teaching: Grades K-6 (0522):71
- test is designed to assess a beginning teacher’s knowledge of a variety of job-related criteria
- questions may require the examinee to do any of the following: demonstrate understanding of the importance of an aspect of teaching,

---

70Educational Testing Service (ets.org). The Praxis Series ™ Tests at a Glance. About This Test in “Special Education Core Principles: Content Knowledge (0353).”
71Educational Testing Service (ets.org). The Praxis Series ™ Tests at a Glance. About This Test in “Principles of Learning and Teaching: Grades K-6 (0522).”
demonstrate understanding of the principles of learning and teaching underlying an aspect of teaching, or recognize when and how to apply the principles of learning and teaching underlying an aspect of teaching.

V.4: Connects knowledge of content area(s) to students’ prior experiences, personal interests and real-life situations by demonstrating that he/she: (a) uses a variety of explanations and multiple representations of concepts, including analogies, metaphors, experiments, demonstrations, and illustrations that help students develop conceptual understanding and (b) generates multiple paths to knowledge and encourages students to see, question, and interpret concepts from a variety of perspectives.

A. Assessment #3: Program Checklist. This “checklist” is an assessment of the progress teacher candidates make in completing the three phases of coursework in the program. In the first phase of courses, called Pre-Professional Area Courses, teacher candidates demonstrate in the EDU 212: Foundations of Education course, that they understand how children learn and develop and how to utilize that knowledge in providing learning opportunities to support students’ intellectual, social and personal development. This study includes the work of theorists such as Jean Piaget and Maria Montessori. The course also explains how students differ in their approaches to learning and how to create instructional activities that are adapted to diverse learners. Theorists such as Howard Gardner are considered, along with those advocates of behaviorism and constructivism. Competence in this area is measured through in-class activities as observed by the instructor, chapter tests and a ten to twenty hour field experience in a local elementary school where the teacher candidate tutors one or more students in a K-6 classroom. In addition, in the SPED 200: Education of Exceptional Students course, teacher education students are presented information related to individual students who are identified in any of the exceptional categories.

Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program. The “C-” grade has been designated by the university as an acceptable passing grade in an effort to minimize grade inflation. In the School of Education, in support of the university’s decision, we interpret the C- as an acceptable standard of performance. In theory, it would be equated to Charlotte Danielson’s rating of “basic” in the domain rubrics contained in her book A Framework for Teaching. Following that train of thought, the B grades would equate to Danielson’s rubric rating of “proficient” and A grades would equate to “distinguished.” If teacher candidates make below a C- in a major course, they have one opportunity to repeat the course and remain in the teacher education program.

In addition to the grade requirement, teacher candidates must also receive a
“met” in each of the eleven professional dispositions adopted by the School of Education. This is determined by the “Professional Dispositions Assessment” form developed by the School of Education and after discussing any concerns as a faculty about any teacher candidate.

The next phase of courses in this assessment process is called Academic Support Area Courses. In the EDU 300: Human Growth and Learning course, teacher candidates take the principles learned in PSYC 111: General Psychology and expand them into an application of those principles in the teaching/learning setting in the classroom. The EDU 312: Effective Pedagogy course addresses the specific teacher pedagogy skills needed by effective teachers, including lesson planning and lesson delivery. The EDU 385: Education Assessment in the Classroom course targets assessment for individual students. The EDU 305: Computer Technology Assisted Instruction course focuses on creating lessons with appropriate technology that engage the K-6 students in the learning process. All other Academic Support Area courses are methods courses for specific content areas: Art (ART 336), Science (ELED 360), Music (ELED 378), Social Studies (ELED 380), Health (HLTH 361), and Physical Education (EXS 375). These methods courses emphasize an understanding of the content area, but their primary focus is on delivery of that content in the elementary classroom. The most current, research-based pedagogy is the goal of each of these courses.

Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

The final phase of course work is called Professional Year Courses. Courses in this phase of the program include the remaining content area methods courses: Language Arts (ELED 320), Reading (ELED 321), and Mathematics (ELED 351). While the emphasis is on pedagogy in these core content areas, content is integral to each course to ensure the most current curriculum standards are taught.

As stated before, teacher candidates must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

B. **Assessment #4: Professional Year Observation & Participation Final Evaluation.** During the teacher candidate’s semester of O&P, every evaluated lesson taught uses the School of Education’s “O&P Observation Form.” Items on the observation form are aligned with the corresponding performance standard(s) in the following table. Parenthetical items (left column) reference where that item appears.

---

72 See Attachment 4.2  
73 See Attachment 4.1
on the lesson observation form. The applicable performance standards and corresponding indicators appear in the right column.

<table>

<td></td>
</tr>
<tr>
<td>• Poses a range of appropriate questions, low to high, in the cognitive, affective, reflective domain (D3)</td>
<td></td>
</tr>
</tbody>
</table>

The formative data collected from the observations is used to complete the “Observation and Participation Evaluation Form.” Teacher candidates must receive a “Pass” rating by their Cooperating Teacher and the university faculty in this Standard, as well as the other standards, and meet the standard for all professional dispositions in order to advance to student teaching.

It should be noted that under our philosophy of pass/not pass, or stated another way, meets the standard/does not meet the standard, teacher candidates understand that they must be able to demonstrate all required competencies as measured on the assessment instruments in O&P and Student Teaching in order to continue in the program and eventually become a program completer. Following legal counsel, several years ago it was decided to shade the “1” rating on the lesson observation forms. The legal counsel was to make sure teacher candidates clearly understood that a “1” rating was unacceptable and had serious consequences. So, in addition to the shading, the wording for the “1” rating that appears on the bottom of the observation forms reads: “Does not meet Standard.”

74 See Attachment 2.4
75 See Attachments 4.1 and 4.3
This does not mean to imply that teacher candidates do not get any “1’s” during O&P or Student Teaching. They do. However, they understand that they must work towards removing those “1’s” as they continue in the program. They understand that the consequence is serious --- not being a program completer.

C. Assessment #5: Professional Year Student Teaching Final Evaluation.

During Student Teaching, the “Student Teaching Observation Form”\textsuperscript{76} is used. The only difference in it and the observation form used in O&P is the addition of a rating of “3” on the form. The “3” is coded as “Distinguished” and is intended to be used in cases where the teacher candidate has truly “distinguished” himself/herself in performing that teaching behavior/practice as a seasoned classroom teacher. Otherwise, the “2” rating is used to assess the teacher candidate as having “met” the standard, while the “1” rating is used to identify performance that “does not meet the standard.”

The formative data collected from these observations is used to complete Section V: Demonstrates Knowledge of Content on the “Year End Student Teaching Evaluation Form.”\textsuperscript{77} Teacher candidates must receive a “Has met standard” rating by their Cooperating Teacher and the university faculty in this Standard.

D. Assessment #6: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form\textsuperscript{78} used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Section V: Demonstrates Knowledge of Content, the following suggested evidences for demonstrating this standard include: lesson plans, computer searches, student work, lesson observation comments by evaluators, photographs, list of coursework, meeting/conference handouts, personal statement(s), and any other item(s) the teacher candidate might consider appropriate.

Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have

\textsuperscript{76} See Attachment 4.3
\textsuperscript{77} See Attachment 2.5
\textsuperscript{78} See Attachment 2.7
sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

Teacher candidates must receive a “Met Standard” on each of the ten standards for the portfolio. If any area is deemed below standard, the teacher candidate must continue working on the portfolio until the university faculty consider it at an acceptable standard for someone desiring to be a program completer.

E. Assessment #8: Praxis II and PLT, K-6. One of the requirements to be a program completer includes having passed the Praxis II tests and the PLT, K-6. These scores must be on file with the School of Education and the pass score used is that set by the state licensing agency, the Hawaii Teacher Standards Board.

The Educational Testing Service, publisher of the Praxis Series of tests gives the following explanation for each of the tests assessed in this category:

Special Education Core Principles: Content Knowledge (0353):79
- the test is designed to measure the candidates understanding of exceptionalities and delivery of services to students with disabilities
- the candidates understanding of causation and the prevention of disabilities is measured
- questions require the candidate to understand the nature of behaviors, including frequency, duration, intensity and degrees of severity

Principles of Learning and Teaching: Grades K-6 (0522):80
- test is designed to assess a beginning teacher’s knowledge of a variety of job-related criteria
- questions may require the examinee to do any of the following: demonstrate understanding of the importance of an aspect of teaching, demonstrate understanding of the principles of learning and teaching underlying an aspect of teaching, or recognize when and how to apply the principles of learning and teaching underlying an aspect of teaching

VI. Designs and Provides Meaningful Learning Experiences. The effective teacher candidate consistently plans and implements meaningful learning experiences for students.

A. Assessment #5: Pre-Professional Year Field Experiences. Prior to the Professional Year field experiences in O&P and Student Teaching, teacher candidates have had a number of opportunities to experience the public school classroom. Beginning with EDU 212: Foundations of Education, teacher candidates are assigned to tutor one or more children for a total of ten to twenty hours, depending on their available schedules. In EDU 312: Effective Pedagogy, ELED 360: Science Methods, and EXS 375: Physical Education for Elementary Teachers, teacher candidates prepare and deliver lessons to students in local elementary schools. Teacher candidates spend approximately ten hours per course completing the field experience component of those courses.

B. Assessment #7: Professional Year Observation & Practicum Field Experience. During the teacher candidate's semester of O&P, every evaluated lesson taught uses the School of Education's "O&P Observation Form." Items on the observation form are aligned with the corresponding performance standard(s) in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The applicable performance standard and corresponding indicators appear in the right column.

83 See Attachment 2.5
suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard VI: Designs and Provides Meaningful Learning Experiences, the following suggested evidences for demonstrating this standard include: lesson plans, graphic organizers, outcomes of projects (samples), lesson observation comments by evaluators, photographs, pre-test/post-test data, examples of rubrics and graded student work, personal statement(s), and any other item(s) the teacher candidate might consider appropriate. Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

VII. Uses Active Student Learning Strategies. The effective teacher candidate consistently uses a variety of active learning strategies to develop students’ thinking, problem-solving and learning skills.

A. Assessment #5: Pre-Professional Year Field Experiences. Prior to the Professional Year field experiences in O&P and Student Teaching, teacher candidates have had a number of opportunities to experience the public school classroom and begin “practicing” the teaching strategies they are taught. Beginning with EDU 212: Foundations of Education, teacher candidates are assigned to tutor one or more children for a total of ten to twenty hours, depending on their available schedules. In EDU 312: Effective Pedagogy, ELED 360: Science Methods, and EXS 375: Physical Education for Elementary Teachers, teacher candidates prepare and deliver lessons to students in local elementary schools. Teacher candidates spend approximately ten hours per course completing the field experience component of those courses.

B. Assessment #7: Professional Year Observation & Practicum Field Experience. During the teacher candidate’s semester of O&P, every evaluated lesson taught uses the School of Education’s “Observation Form.”84 Items on the observation form are aligned with the corresponding performance standard in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The applicable performance standard and corresponding indicators appear in the right column.

<table>

</tr>
<tr>
<td>• manages allocated time effectively to ensure learning takes place (A4)</td>
</tr>
</tbody>
</table>

C. Assessment #8: Professional Year Student Teaching Experience.
During the teacher candidate’s semester of Student Teaching, like O&P, every evaluated lesson taught uses the School of Education’s “Observation Form.”85 The only difference in it and the observation form used in O&P is the addition of a rating of “3” on the form. The “3” is coded as “Distinguished” and is intended to be used in cases where the teacher candidate has truly “distinguished” himself/herself in performing that teaching behavior/practice as a seasoned classroom teacher. Otherwise, the “2” rating is used to assess the teacher candidate as having “met” the standard, while the “1” rating is used to identify performance that “does not meet the standard.”

The formative data collected from these observations is used to complete Section VII: Uses Active Student Learning Strategies on the “Year End Student Teaching Evaluation Form.”86 Teacher candidates must receive a “Has met standard” rating by their Cooperating Teacher and the university faculty in this Standard.

D. Assessment #9: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each

85 See Attachment 4.3
86 See Attachment 2.5
of the ten standards.

For example, for Standard VII: Uses Active Student Learning Strategies, the following suggested evidences for demonstrating this standard include: lesson plans, photographs, student work, lesson observation comments by evaluators, student projects (plans and examples), personal statement(s), and any other item(s) the teacher candidate might consider appropriate. Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

VIII. Uses Assessment Strategies. The effective teacher candidate consistently applies appropriate assessment strategies to evaluate and ensure the continuous intellectual, social, physical and emotional development of the learner.

A. Assessment #5: Pre-Professional Year Field Experiences. Prior to the Professional Year field experiences in O&P and Student Teaching, teacher candidates have had a number of opportunities to experience the public school classroom and begin “practicing” the teaching strategies they are taught. Beginning with EDU 212: Foundations of Education, teacher candidates are assigned to tutor one or more children for a total of ten to twenty hours, depending on their available schedules. In EDU 312: Effective Pedagogy, ELED 360: Science Methods, and EXS 375: Physical Education for Elementary Teachers, teacher candidates prepare and deliver lessons to students in local elementary schools. Teacher candidates spend approximately ten hours per course completing the field experience component of those courses.

B. Assessment #7: Professional Year Observation & Practicum Field Experience. During the teacher candidate’s semester of O&P, every evaluated lesson taught uses the School of Education’s “Lesson Observation Form.” Items on the observation form are aligned with the corresponding performance standard in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The applicable performance standard and corresponding indicators appear in the right column.

| • lesson in concert with IEP objectives as needed and shown in the lesson plan (B15) | (5) Obtains and uses information about students’ experiences, strengths, needs and progress from parents, colleagues and students themselves |
| • lesson plan is complete, clearly written, and follows Hawaii content standards with clear measurable outcomes (B1) | (6) Uses assessment data to monitor and evaluate students’ progress toward achieving Hawaii’s student content and performance standards |
| • assessment demonstrates objectives were met (B16) | (7) Maintains appropriate and accurate records of student achievement and communicates students’ progress to students, parents and colleagues as needed |

88 See Attachment 4.3
89 See Attachment 2.5
suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard VIII: Uses Assessment Strategies, the following suggested evidences for demonstrating this standard include: lesson plans, student portfolios, gradebook, pre-test/post-test data, lesson observation comments by evaluators, notes/letters to parents, student work with rubrics and written evaluations, student journals, personal statement(s), and any other item(s) the teacher candidate might consider appropriate. Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

**IX. Demonstrates Professionalism.** The effective teacher candidate continually evaluates the effects of his or her choices and actions and actively seeks opportunities to grow professionally.

**A. Assessment #2: Admissions Interview.** Students desiring to major in the dual elementary/special education must be formally admitted into the School of Education. The Admissions Interview actually contains quite a few pieces of information in order to assess the student’s suitability for being admitted into a teacher education program. One, students must complete a “Declaration of Fitness” statement. This statement speaks to the “professionalism” of a teacher since it deals with areas of offense that would make it inappropriate for an individual to be in an elementary/special education classroom.

Another item requires the intended major to view and pass the test on bloodborne pathogens, an area of concern in the public schools. Students view a video made by the Hawaii Department of Education and then take a short test. Personnel in the School of Education check the test and if the student misses more than one on the test, they must correct their response(s). Otherwise, they are considered to have passed the test.

Students are required to have passing scores on the PPST Reading, Writing and Mathematics tests, a cumulative grade point average of 2.0 or higher, an academic map with intended graduation date on file with the Academic Advisor, and an accounting of the number of hours that will be completed by the time the student completes the program. These items are verified on a form in the packet by the Academic Advisor.
The admissions process also requires two letters of recommendation from persons outside the School of Education. The forms provide a checklist of items including oral and written communication skills, judgment, initiative, collaborative skills, and scholastic aptitude. The form also allows the writer to speak to the likelihood of the applicant to be a successful classroom teacher.

The completed packet also includes three questions the applicant must respond to in their own handwriting. There is also one open-ended form for the applicant to add anything they'd like to share with the faculty.

When the admissions packet is complete, the interview is scheduled. After reviewing the admissions packet information, faculty conducting the interview ask several questions of the applicant. Some of the questions are printed on the instructions sheet for the admissions packet so the applicant has a chance to prepare their responses ahead of time. In addition, the faculty interviewing ask a few questions in order to assess the applicant's ability to respond to questions extemporaneously.

At the conclusion of the interview, the two interviewing faculty compare their individual evaluation rating sheets and make a determination as to the admissibility of the applicant. If there are any concerns by either or both of the interviewers, a second interview with different faculty is requested. All four faculty must concur in the decision regarding the applicant's admissibility.

B. Assessment #3: Program Checklist. This "checklist" is an assessment of the progress teacher candidates make in completing the three phases of coursework in the program. In the first phase of courses, called Pre-Professional Area Courses, teacher candidates demonstrate in the EDU 212: Foundations of Education course, that they understand how children learn and develop and how to utilize that knowledge in providing learning opportunities to support students' intellectual, social and personal development. This study includes the work of theorists such as Jean Piaget and Maria Montessori. The course also explains how students differ in their approaches to learning and how to create instructional activities that are adapted to diverse learners. Theorists such as Howard Gardner are considered, along with those advocates of behaviorism and constructivism. Competence in this area is measured through in-class activities as observed by the instructor, chapter tests and a ten to twenty hour field experience in a local elementary school where the teacher candidate tutors one or more students in a K-6 classroom. In addition, in the SPED 200: Education of Exceptional Students course, teacher education students are presented information related to individual students who are identified in any of the exceptional categories.

90 See Attachment 2.2
Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program. The “C-” grade has been designated by the university as an acceptable passing grade in an effort to minimize grade inflation. In the School of Education, in support of the university’s decision, we interpret the C- as an acceptable standard of performance. In theory, it would be equated to Charlotte Danielson’s rating of “basic” in the domain rubrics contained in her book A Framework for Teaching. Following that train of thought, the B grades would equate to Danielson’s rubric rating of “proficient” and A grades would equate to “distinguished.” If teacher candidates make below a C- in a major course, they have one opportunity to repeat the course and remain in the teacher education program.

In addition to the grade requirement, teacher candidates must also receive a “met” in each of the eleven professional dispositions adopted by the School of Education. This is determined by the “Professional Dispositions Assessment” form developed by the School of Education and after discussing any concerns as a faculty member about any teacher candidate.

The next phase of courses in this assessment process is called Academic Support Area Courses. In the EDU 300: Human Growth and Learning course, teacher candidates take the principles learned in PSYC 111: General Psychology and expand them into an application of those principles in the teaching/learning setting in the classroom. The EDU 312: Effective Pedagogy course addresses the specific teacher pedagogy skills needed by effective teachers, including lesson planning and lesson delivery. The EDU 385: Education Assessment in the Classroom course targets assessment for individual students. The EDU 305: Computer Technology Assisted Instruction course focuses on creating lessons with appropriate technology that engage the K-6 students in the learning process. All other Academic Support Area courses are methods courses for specific content areas: Art (ART 336), Science (ELED 360), Music (ELED 378), Social Studies (ELED 380), Health (HLTH 361), and Physical Education (EXS 375). These methods courses emphasize an understanding of the content area, but their primary focus is on delivery of that content in the elementary and/or special education classroom. The most current, research-based pedagogy is the goal of each of these courses.

Students must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

91 See Attachment 4.2
The final phase of course work is called Professional Year Courses. Courses in this phase of the program include the remaining content area methods courses: Language Arts (ELED 320), Reading (ELED 321), and Mathematics (ELED 351). While the emphasis is on pedagogy in these core content areas, content is integral to each course to ensure the most current curriculum standards are taught.

As stated before, teacher candidates must successfully complete all courses in this area with a C- or higher grade, maintain a cumulative grade point average of 2.0 or higher and meet all professional dispositions in order to continue in the program.

C. Assessment #4: Professional Year Observation & Practicum Field Experience. During the teacher candidate’s semester of O&P, every evaluated lesson taught uses the School of Education’s “Lesson Observation Form.” Items on the observation form are aligned with the corresponding performance standard in the following table. Parenthetical items (left column) reference where that item appears on the lesson observation form. The applicable performance standard and corresponding indicators appear in the right column.

<table>
<thead>
<tr>
<th>Lesson Observation Form</th>
<th>Performance Standard IX: Demonstrates Professionalism</th>
</tr>
</thead>
<tbody>
<tr>
<td>• demonstrates professional behavior (F3)</td>
<td>(4) Conducts self ethically in professional matters</td>
</tr>
<tr>
<td>• demonstrates professional behavior (F3)</td>
<td>(5) Models honesty, fairness and respect for individuals and for the laws of society</td>
</tr>
</tbody>
</table>

However, in addition to the Hawaii Teacher Standards Board’s standard on professionalism, the School of Education has adopted its list of professional dispositions to complement the Board’s standard. The following table aligns the School of Education dispositions with HTSB’s performance standard on professionalism and its corresponding indicators.

<table>
<thead>
<tr>
<th>Professional Dispositions</th>
<th>Performance Standard IX: Demonstrates Professionalism</th>
</tr>
</thead>
<tbody>
<tr>
<td>• being a reflective learner</td>
<td>(1) Engages in relevant opportunities to grow professionally, e.g., taking university/college or in-service coursework, actively participating in a professional organization, serving on a cadre, council, or committee or serving as a cooperating teacher, mentor or advisee</td>
</tr>
<tr>
<td>• flexibility</td>
<td>(2) Reflects on practices and monitors own teaching activities and</td>
</tr>
</tbody>
</table>

92 See Attachment 4.1
93 See Attachment 4.2
Teacher candidates must receive a “Met Standard” rating by their Cooperating Teacher and the university faculty in all ten of the standards and meet all professional dispositions in order to continue in the program.

**D. Assessment #5: Professional Year Student Teaching Experience.**
During the teacher candidate’s semester of Student Teaching, like O&P, every evaluated lesson taught uses the School of Education’s “Observation Form.” The only difference in it and the observation form used in O&P is the addition of a rating of “3” on the form. The “3” is coded as “Distinguished” and is intended to be used in cases where the teacher candidate has truly distinguished himself/herself in performing that teaching behavior/practice as a seasoned classroom teacher. Otherwise, the “2” rating is used to assess the teacher candidate as having “met” the standard, while the “1” rating is used to identify performance that “does not meet the standard.”

The formative data collected from these observations is used to complete Section IX: Demonstrates Professionalism on the “Year End Student Teaching Evaluation Form.” Teacher candidates must receive a “Has met standard” rating by their Cooperating Teacher and the university faculty in this Standard.

**E. Assessment #9: Performance Outcomes Portfolio.** Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching,

---

94 See Attachment 4.3
95 See Attachment 2.5
teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard IX: Demonstrates Professionalism, the following suggested evidences for demonstrating this standard include: meeting/conference handouts, list of professional books and journals read, examples of team projects, list of school activities participated in, formal evaluations demonstrating implementation of feedback, lesson observation comments by evaluators, journal entries, curriculum alignment, grade level planning, professional memberships, certificates, attendance card, honor code agreement, personal statement(s), and any other item(s) the teacher candidate might consider appropriate. Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.

Teacher candidates must receive a “Met Standard” on each of the ten standards for the portfolio. If any area is deemed below standard, the teacher candidate must continue working on the portfolio until the university faculty consider it at an acceptable standard for someone desiring to be a program completer.

| X. Fosters Parent and School Community Relationships. The effective teacher candidate establishes and maintains strong working relationships with parents and members of the school community to support student learning. |

| A. Assessment #4: Professional Year Observation & Participation Final Evaluation. Unlike the other standards, Standard X has no specific observable behavior on the current School of Education’s “Lesson Observation Form.” When lessons are observed that include community resources, the observer makes note of that in their comments. As for the “relationships” portion of this standard, evidences are collected by the teacher candidate and included in their performance portfolio. The Cooperating Teacher, who is in the position of knowing the day to day interactions with those in the school community and the parents, has the opportunity |

96 See Attachment 4.1
to assess the teacher candidate on the O&P mid-term and final evaluation form by marking “not pass” or “pass” in the following items pertaining to this standard:

1. utilizes school/community resources to enhance student learning
2. collaborates with parents and school personnel to support the learning needs of students

B. Assessment #5: Professional Year Student Teaching Final Evaluation.
Unlike the other standards, Standard X has no specific observable behavior on the current School of Education’s “Observation Form.”97 When lessons are observed that include community resources, the observer makes note of that in their comments. As for the “relationships” portion of this standard, evidences are collected by the teacher candidate and included in their performance portfolio. The Cooperating Teacher, who is in the position of knowing the day to day interactions with those in the school community and the parents, has the opportunity to assess the teacher candidate on the Student Teaching mid-term and final evaluation form by marking “not pass” or “pass” for the standard as measured by the following items:

1. utilizes school/community resources to enhance student learning
2. collaborates with parents and school personnel to support the learning needs of students
3. supports school related activities and programs that encourage parents to actively participate
4. establishes open and active lines of communication with parents
5. utilizes school/community resources to enhance student learning

C. Assessment #6: Performance Outcomes Portfolio. Although teacher candidates are introduced to the fact early in their program that they will conclude Student Teaching with a Performance Outcomes Portfolio, serious attention is given to it in the O&P and Student Teaching semesters. By the end of Student Teaching, teacher candidates submit their portfolio for evaluation by the faculty. Teacher candidates have received a copy of the form used to evaluate their portfolios to use as a guide in compiling their evidences under each of the ten performance and licensing standards. By becoming familiar with the suggested evidences on the form, teacher candidates also have the opportunity to internalize how each of the suggested evidences might be used to demonstrate successful performance for each of the ten standards.

For example, for Standard X: Fosters Parent and School Community Relationships, the following suggested evidences for demonstrating this standard include: record of IEP participation, notes/letters written to parents, notes/letters

97 See Attachment 4.3
received from parents, lesson observation comments by evaluators, newsletters, use of community resources, photographs, personal statement(s), and any other item(s) the teacher candidate might consider appropriate. Samples of teacher candidate portfolios have been collected and retained for review. We believe these samples will clearly show that our teacher candidates have sufficient knowledge and skills in understanding the standards and providing appropriate evidences to demonstrate not only their understanding, but the success of implementing that knowledge and skills in their classroom with the students they have stewardship over.
Directions: The objectives of the practicum are closely related to those of the student teaching. Practicum students begin developing skills, knowledge, and attitudes that will be expanded, added to, and refined in student teaching. Therefore, the objectives and evaluation criteria for practicum are based upon the more extensive objectives of student teaching.

Within the limited time available, it is intended that the BYU-Hawaii student will develop the following traits:

I. Focuses on the Learner
   1. Relates instruction to students' interests, experiences and/or real-life situations.
   2. Uses appropriate activities to promote students' successes.
   3. Takes time to listen and respond to students' concerns and interests.
   4. Nurtures students' desire to learn and achieve.
   5. Uses a variety of strategies or activities which recognize the idea of multiple intelligences and learning styles.

   Comments:

II. Safe and Positive Learning Environment
   1. Models a caring attitude and promotes mutual respect among students.
   2. Classroom environment is conducive for learning.
   3. Uses appropriate behavior management practices.
   4. Promotes developmentally appropriate learning experiences that enable student success.

   Comments:

III. Adapts to Learner Diversity
   1. Adapts instruction to provide for learners' differences in development, multiple intelligence and achievement levels.
   2. Adapts instruction to include learners with special, cultural and linguistic needs, as applicable.
   3. Develops rapport with all students.
   4. Fosters respect and empathy among diverse learners.

   Comments:

   (NP) Not Passed    (P) Passed
IV. Fosters Communication in the Learning Environment

1. Writes and spells in clear standard English.  
2. Communicates openly with all students and others working in the learning environment.  
3. Uses vocabulary that is appropriate for students' ages and interests.  
4. Engages students in different modes of communication.  
5. Lesson is engaging and encourages student participation.

Comments:

V. Demonstrates Knowledge of Content

1. Demonstrates knowledge of major concepts and methods in content areas.  
2. Connects knowledge of content areas to students' prior experiences, personal interests and real-life situations.  
3. Utilizes school's current technologies to facilitate learning in the content areas.

Comments:

VI. Designs and Provides Meaningful Learning Experiences

1. Instructional plan is compatible with the school and system-wide curricular goals.  
2. Lesson plan is complete, written and used to guide instruction.  
3. Incorporates a variety of appropriate assessment strategies.  
4. Lesson plans clearly state connections to the Hawaii Content and Performance Standards.  
5. Applies concepts that help students relate learning to everyday life.  
6. Lesson is engaging and encourages student participation.

Comments:

VII. Uses Active Student Learning Strategies

1. Helps students to question, problem-solve and access resources.  
2. Engages students in active, hands-on, creative, open-ended and problem-based learning experiences.  
3. Provides opportunities for students to apply and practice what is learned.  
4. Uses school's current technologies as tools for teaching and learning.

Comments:

(NP) Not Passed (P) Passed
VIII. Uses Assessment Strategies

1. Uses a variety of appropriate assessment strategies.  
2. Obtains and uses information about students’ experiences, strengths and needs.  
3. Engages students in self-assessment activities.  
4. Helps keep accurate and updated student records.

Comments:

<table>
<thead>
<tr>
<th></th>
<th>NP</th>
<th>P</th>
</tr>
</thead>
</table>

IX. Demonstrates Professionalism

1. Displays appropriate appearance and evidence of good health practices.  
2. Uses initiative in becoming involved in classroom activities.  
3. Accepts evaluative feedback professionally and adjusts performance accordingly.  
4. Demonstrates good work habits including reliability, punctuality, etc.  
5. Displays an appropriate sense of humor.  
6. Works collaboratively with other professionals.  
7. Student is dressed to a professional standard.

Comments:

<table>
<thead>
<tr>
<th></th>
<th>NP</th>
<th>P</th>
</tr>
</thead>
</table>

X. Fosters Parent and School Community Relationships

1. Utilizes school/community resources to enhance student learning.  
2. Works with parents and school personnel to support the learning needs of students.

Comments:

<table>
<thead>
<tr>
<th></th>
<th>NP</th>

</table>

Evaluation Conference

Near the end of the practicum experience, the cooperating teacher should meet with the practicum student to discuss, in general terms at least, the strengths and weaknesses of his/her performance. The conference, as well as prior evaluation conferences, should be based upon the criteria presented in the evaluation form which will be completed by the cooperating teacher and returned to the teacher education program instructor at the end of the practicum.

Professional Dispositions Assessment

Page 1 of 2

BRIGHAM YOUNG UNIVERSITY HAWAII
SCHOOL OF EDUCATION
PROFESSIONAL DISPOSITIONS* ASSESSMENT

Teacher/Supervisor: ____________________ Candidate: ____________________ BYUH ID: ____________________

Course: ____________________ Date: ____________ Semester: □ Fall □ Winter □ Spring □ Summer

**Personal Integrity:**

Candidate was honest and forthright in all dealings with students, teachers and school personnel. There was no evidence of lying, cheating, plagiarizing, or any other type of deception.

□ Meets Expectation □ Does not meet standard for the following reason(s):

**Respect for Authority:**

Candidate showed respect for the teacher/supervisor and others in authority with whom he/she interacts (e.g., courtesy, appropriate body language, recognition of experience/expertise of teacher/supervisor, acceptance of feedback, appropriate use of title). Candidate also showed respect for all he/she came in contact with by acknowledging the experience and expertise of teachers/supervisors and recognizing the opportunity to benefit from this additional experience and training.

□ Meets Expectation □ Does not meet standard for the following reason(s):

**Learning Community:**

Candidate contributed positively in class by demonstrating an openness for learning, paying attention, supporting the teacher and classmates (regardless of any differences such as racial/ethnic, religious or cultural), contributing positively to the learning of classmates in whole or group activities, avoiding conflicts, and refraining from disruptive activities (e.g., talking on phone, eating, reading newspaper, carrying on a conversation).

□ Meets Expectation □ Does not meet standard for the following reason(s):

**Responsibility:**

Candidate turned in assignments on time, and addressed all details and requirements adequately. In class, he/she had read assigned materials, often contributed meaningfully to class discussions, and carried a full share of the work in all cooperative activities. In class, candidate came fully prepared, having read assignments and completed all other activities assigned or suggested outside of class. Such preparation also allowed the candidate to make contributions in class.

□ Meets Expectation □ Does not meet standard for the following reason(s):

**Attendance:**

Candidate attended class and/or other program activities, following the School of Education policy.

□ Meets Expectation □ Does not meet standard for the following reason(s):

* All professional dispositions must be demonstrated in order to pass Standard IX: Professionalism as established by the Hawaii Teacher Standards Board.

Number of Students

Grade

Ages

Date

Time

*Note: The Roman numeral(s) indicate alignment to Hawaii Teacher Performance and Licensing Standard(s) (HTP/S)*

#### A. Management of Instructional Time

1. Has materials, supplies and equipment ready at the start of the lesson (VI)

2. Gets the class started quickly (I,II)

3. Maintains a high level of student time on task (I,II)

4. Manages allocated time effectively to ensure learning takes place (VII)

#### B. Instructional Presentation

1. Lesson plan is complete, clearly written, and follows Hawaii content standards with clear measurable outcomes (VI)

2. Matches lesson to maturity level of students and degree of difficulty is appropriate (I,IV)

3. Includes focus and/or review in instructional presentation (IV,VI)

4. Connects concepts to prior knowledge & experiences (I,V,VI)

5. Uses examples/demonstrations which are relevant & developmentally & contextually appropriate (VI)

6. Presents instruction clearly and understandably to students (IV,V,VI)

7. Varies the pace of the lesson to suit activity and pupil responses (I,VI)

8. Instructional transitions are efficient and smooth (I,VI)

9. Lesson engages and encourages student participation (II,VIII)

10. Assignments are clear and developmentally appropriate (III,VI)

11. Uses lesson plan to guide instruction (I,III,IV,VI)

12. Adjusts the lesson plan during the lesson as needed (I,II)

13. Teaches different learning styles as noted in lesson plan (III)

14. Modifications made for learning needs of individual students are noted in lesson plan

15. Lesson in concert with IEP objectives as noted and shown in the lesson plan (VIII)

16. Assessment demonstrates objectives were met (VI)

17. Includes appropriate closure in instructional presentation (VI)

V. Use of Assessment Results to Improve Candidate and Program Performance

The following table shows program changes based on each of the ten assessments for the dual elementary/special education program:

<table>
<thead>
<tr>
<th>Assessment #</th>
<th>Change(s) in Program since last SATE Review Based on Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Praxis I Reading, Writing, Mathematics</td>
<td>The Praxis I Reading, Writing and Mathematics tests are required of all students entering a teacher education program in the School of Education. To assist students, the SOE makes available on a voluntary basis and for a small fee the Plato company's computer-based tutorial for the PPST, Learning Plus. In addition, students are advised to utilize the web-based test study materials made available by the producer of the tests, Educational Testing Service (ETS). The Academic Advisor for the SOE also has available in her office copies of study guides on a week-long checkout basis.</td>
</tr>
<tr>
<td>2. Admissions Interview</td>
<td>Working together with the mindset of being teacher educators rather than segregated as elementary, secondary, or special education, all three programs have worked together to develop a common admissions packet and process. As a result, a set of common questions are asked all elementary, secondary and special education applicants. A common rating sheet is used by each interviewer to determine if the applicant has “Met” or “Not Met” the criteria for each area contained in the packet, including the interview. This has proven helpful in several ways, including the ability of faculty from different “programs” to assist in the process, as two faculty are required for conducting each interview and evaluating the admissions packet.</td>
</tr>
</tbody>
</table>
### Pre-Professional Area Courses:

Two introductory courses each had field experience components attached to them. One was a 100-level course and the other a 200-level course. Feedback from faculty teaching those courses indicated there was too much redundancy between the two courses. They also felt the sheer logistics of scheduling students at the local schools was overwhelming and complicated for several reasons. One, only one elementary school is within walking distance of campus and most students do not have their own transportation. Two, having to provide transportation to the next closest school(s) was not always possible since motor pool vans were often booked far in advance, oftentimes not being available for the education courses' field experience needs. Third, available teachers at the local school(s), who were recommended by their principal and also willing to participate in the program, were limited. This almost always resulted in several students having to be assigned to one teacher in the school. The larger numbers often made teachers even less willing to be involved with the program. Therefore, all feedback considered, the decision was made to reduce the two courses to one course with a lab attached to it. Recently, again after much feedback from students and faculty teaching the course and lab, the decision was made to merge the lab with the course. This was done to give the faculty control over the students in the lab experience. Rather than two different faculty, one for the course and one for the lab, one faculty now is responsible for both the classroom portion of the course and the field experience. This is providing a “tighter” alignment between course and field experience.

In the spirit of thinking more like teacher educators rather than departments of elementary, secondary, or special education faculty, a School of Education review of all courses included a recommendation to consolidate the secondary, elementary, and special education “Introduction to Education” courses. This consolidation of sections has allowed more flexibility with faculty schedules and created class sizes that are still small, yet, more in line with university reviews of campus productivity. Another benefit of this shift has been an overall acceptance by students of faculty in the School of Education as teacher educators, rather than having a program of two faculty. Now, instead of students completing their program in the School of Education having only had two or three of the faculty, students now complete their program...
having classes from almost every faculty in the School of Education. This shift has also allowed a more tightly knit relationship among faculty and a more supportive network as faculty are constantly reviewing the status and progress of programs based on assessment data.

**Academic Support Area Courses:** Several courses have been consolidated into single sections for all teacher education students, regardless of their major being elementary, secondary or special education. In addition to the “Introduction to Education” course cited previously, two courses in this assessment area have been affected by this change: EDU 312, Effective Pedagogy, and EDU 385, Classroom Assessment.

**Professional Year Courses:** Several courses have been consolidated into single sections for all teacher education students, regardless of their major being elementary, secondary or special education. In addition to the courses cited previously, one course in this assessment area has been affected by this change: EDU 330, Classroom Management. Also, based on student feedback and recommendation of the reading faculty in elementary, the two courses that taught Language Arts Methods and Reading Methods as separate courses have been re-configured as Emergent Readers and Fluent Readers. This change is being implemented for the 2006-2007 school year.

<table>
<thead>
<tr>
<th>4. Professional Year Observation &amp; Participation Final Evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>5. Professional Year Student Teaching Final Evaluation</td>
</tr>
<tr>
<td>6. Performance Outcomes Portfolio</td>
</tr>
</tbody>
</table>

Per implementation of the performance and licensing standards by the Hawaii Teacher Standards Board, the School of Education aligned its evaluation forms to clearly show each of the standards and whether the teacher candidate had “Met” or “Not Met” each standard. These changes affected the Mid-Term and Final Evaluation Forms for both semesters of field experience in the Professional Year: Observation & Participation and Student Teaching. In addition, the individual lesson observation form was reviewed by faculty in order to determine where each item on the lesson observation form aligned with the HTSB Standards.

In keeping with the shift to demonstrate how the K-6 students’ learning had been impacted for good by the teacher candidate, the School of Education implemented a performance outcomes portfolio requirement for the program. The portfolio must clearly show evidences for each and every one of the ten HTSB
In addition to the changes noted in the above table, all teacher candidates complete a School of Education “Exit Interview” prior to leaving the university. This form asks specific questions about various aspects of the teacher education preparation and allows students to make additional comments, suggestions, etc. about each of those areas. In addition, on the last page, the open response question allows teacher candidates to comment on anything not addressed in the previous questions.
Oftentimes, students will take the opportunity to make additional positive comments about their experiences. Others also take the opportunity to make suggestions on how to improve the experience.

Based on these suggestions over the years, some significant course changes have been made in the program:
- EDU 385, Assessment was actually created as a separate course based largely on students' feedback on these “Exit Interviews.”
- EDU 330, Classroom Management was another course created as a separate course based largely on students' feedback.
- EDU 385, Assessment was increased in semester hour credits about a year ago as a result of a faculty recommendation and supported by students' feedback.
- EDU 360, Science Methods was increased in semester hour credits about a year ago as a result of a faculty recommendation and supported by students' feedback.

A very significant change in the School of Education since the last SATE Review has been the addition of nearly two dozen adjunct faculty to help supervise teacher candidates during the O&P and Student Teaching Field Experiences. In all cases, these adjunct faculty are licensed classroom teachers. In almost all cases, these adjunct faculty are retired teachers of the Hawaii Department of Education. The two exceptions are two university faculty spouses who are licensed teachers from the State of Utah. The School of Education has had the benefit of over five decades of classroom experience with the combined expertise of these adjunct faculty. Their service cannot be measured. They have been an absolute blessing to our program. They have provided invaluable feedback at our coordination meetings held at the start and end of each semester. Their feedback has led to changes in program procedures, policies, etc. almost at every coordinating meeting.

Our adjunct faculty also provide a public relations network between the university and the individual schools' teachers and principals. Because of the standing within the community these adjunct have, they know many of the Department of Education teachers and administrators. As a result of these "connections," our adjunct faculty have made it possible to recruit and retain many of the Cooperating Teachers we have and to even have placements in some of the schools we partner with.

In addition, the adjunct faculty are able to conference with the teacher candidates and make suggestions on how to improve and point out where there are strengths. Often, the teacher candidates seem to take more seriously the adjunct's suggestions than they do the university faculty's! But, to have the expertise of this "expanded faculty," if you will, is nothing but a plus for our teacher candidates.
Secondarily, this “expanded faculty” is certainly a value to the School of Education faculty in providing the extra “eyes” to mentor and supervise the teacher candidates. With a relatively small faculty, the extra help is sorely needed and very much appreciated! Needless to say, many of the “highlights” of our program are a direct result of the contributions our adjunct faculty have made.
